First Idea

- The Vision: Parallax scrolling [Background rev. 1]
- The Solution: Skrollr

CSS

```
 1   . skrollable {
 2       position : fixed ;
 3       z−index :100;
 4   }
 5   #bg1 , #bg2 , #bg3 {
 6       top:−100%;
 7       left :0;
 8       width :100%;
 9       height :300%;
10   }
11   #bg1 {
12       z−index :50;
13       background : url ( images / Airships1 −big . png ) ;
14       background−size :50%;
15   }
16   #bg2 {
17       z−index :49;
18       background−size :40%;
19       background−image : url ( images / Airships2 −big . png ) ;
20   }
21   #bg3 {
22       z−index :48;
23       background−size :30%;
24       background−image : url ( images / Airships3 −big . png ) ;
25   }
```

HTML

```html
1   <div
2       id="bg1"
3       class="background"
4       data-0="top:0px;"
5       data-end="top: -100px;">
6   </div>
7   <div
8       id="bg2"
9       class="background"
10      data-0="top:0px;"
11      data-end="top: -200px;">
12  </div>
13  <div
14      id="bg3"
15      class="background"
16      data-0="top:0px;"
17      data-end="top: -300px;">
18  </div>
```

The Images
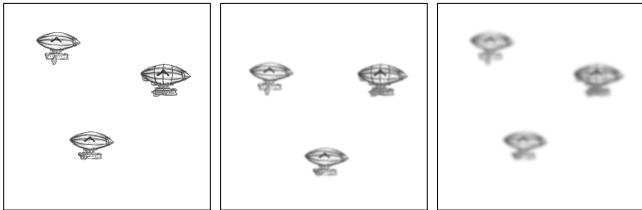

Based on work by the wonderful Alissa Mathiasmeier.
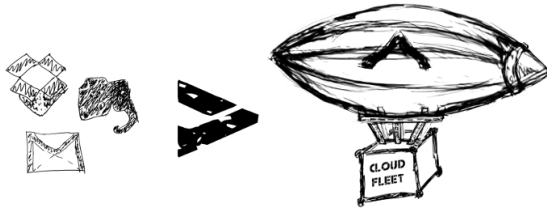

More Ambitious

- The Vision: Parallax scrolling [Background rev. 2]
- The Solution: CSS animations

CSS

```css
 1  #bg1 {
 2      -webkit-animation: animatedBackground 40s linear infinite;
 3  }
 4  #bg2 {
 5      -webkit-animation: animatedBackground2 100s linear infinite;
 6  }
 7  #bg3 {
 8      -webkit-animation: animatedBackground3 200s linear infinite;
 9  }
10  @-webkit-keyframes animatedBackground {
11      from { background-position: 0; }
12      to { background-position: 100%; }
13  }
14  @-webkit-keyframes animatedBackground2 {
15      from { background-position: 0; }
16      to { background-position: 133.33%; }
17  }
18  @-webkit-keyframes animatedBackground3 {
19      from { background-position: 0; }
20      to { background-position: 171%; }
21  }
```
